

STCN – List of Experiments

1. Implementation of framing techniques (Bit Stuffing and Byte Stuffing).
2. Implementation of error detection techniques:
 - a) Parity bit
 - b) Checksum
 - c) Cyclic Redundancy Check (CRC).
3. Implementation of error correction technique: Hamming Code
4. Implementation of Client–Server communication using TCP sockets.
5. Implementation of UDP client–server communication.
6. Implementation of Routing algorithms.
 - a) Shortest Path Routing
 - b) Distance Vector Routing
7. Implementation of flow control techniques:
 - a) Stop & Wait
 - b) Go-Back-N
 - c) Selective Repeat
8. Implementation of Leaky Bucket and Token Bucket traffic shaping.
9. Implementation of Caesar Cipher / Substitution Cipher.
10. RSA algorithm implementation (key generation, encryption, decryption).
11. Simulation of Routing Algorithms using NS-2 Simulator.
